

1 ENERGY AND ENVIRONMENT CABINET

2 Department for Natural Resources

3 Division of Mine Permits

4 (Amendment)

5 405 KAR 8:030. Surface coal mining permits.

6 RELATES TO: KRS 350.060, 350.465, 7 C.F.R. Part 657, 30 C.F.R. Parts 77.216-1,  
7 77.216-2, 730-733, 735, 773.13(a), 778-780, 785.17(b), (d), 917, 40 C.F.R. Parts 136, 434, 16  
8 U.S.C. 1276(a), 1531 et seq., 30 U.S.C. 1253, 1255, 1257, 1258, 1267

9 STATUTORY AUTHORITY: KRS 350.020, 350.028, 350.060, 350.465, 7 C.F.R. Part  
10 657, 30 C.F.R. Parts 77.216-1, 77.216-2, 730-733, 735, 773.13(a), 778-780, 785.17(b), (d), 917, 40  
11 C.F.R. Parts 136, 434, 16 U.S.C. 1276(a), 1531 et seq., 30 U.S.C. 1253, 1255, 1257, 1258, 1267

12 NECESSITY, FUNCTION, AND CONFORMITY: KRS 350.028(1), (5), 350.060(13),  
13 and 350.465(2) authorize the cabinet to promulgate administrative regulations relating to surface  
14 and underground coal mining operations. This administrative regulation establishes requirements  
15 for the grant of a surface coal mining permit. This administrative regulation differs from 30 CFR  
16 780.25. Section 34(3) and (5) of this administrative regulation require that the following be  
17 submitted to the cabinet after approval by the Mine Safety and Health Administration (MSHA):

18 (1) A copy of the final approved design plans for impounding structures;

19 (2) A copy of all correspondence with MSHA;

20 (3) A copy of technical support documents requested by MSHA;

1 (4) A notarized statement by the applicant that the copy submitted to the cabinet is a  
2 complete and correct copy of the final plan approved by MSHA. These requirements are necessary  
3 to minimize duplication of technical review by MSHA and the cabinet, and to minimize conflicts  
4 that may arise from duplication of review.

5 Section 1. General. (1) This administrative regulation applies to any person who applies for  
6 a permit to conduct surface mining activities.

7 (2) The requirements set forth in this administrative regulation specifically for applications  
8 for permits to conduct surface mining activities are in addition to the requirements applicable to all  
9 applications for permits to conduct surface coal mining and reclamation operations as set forth in  
10 405 KAR 8:010.

11 (3) This administrative regulation sets forth information required to be contained in  
12 applications for permits to conduct surface mining activities, including:

- 13 (a) Legal, financial, compliance, and related information;
- 14 (b) Environmental resources information; and
- 15 (c) Mining and reclamation plan information.

16 Section 2. Identification of Interests. An application shall contain the following  
17 information, except that the submission of a Social Security number is voluntary:

18 (1) A statement as to whether the applicant is a corporation, partnership, single  
19 proprietorship, association, or other business entity;

20 (2) The name, address, telephone number and, as applicable, Social Security number and  
21 employer identification number of the:

- 22 (a) Applicant;
- 23 (b) Applicant's resident agent; and

1 (c) Person who will pay the abandoned mine land reclamation fee.

2 (3) For each person who owns or controls the applicant:

3 (a) The person's name, address, Social Security number, and employer identification  
4 number;

5 (b) The person's ownership or control relationship to the applicant, including percentage of  
6 ownership and location in organizational structure;

7 (c) The title of the person's position, date position was assumed, and when submitted under  
8 405 KAR 8:010, Section 18(5) date of departure from the position;

9 (d) Each additional name and identifying number, including employer identification  
10 number, federal or state permit number, and MSHA number with date of issuance, under which the  
11 person owns or controls, or previously owned or controlled, a surface coal mining and reclamation  
12 operation in the United States within the five (5) years preceding the date of the application; and

13 (e) The application number or other identifier of, and the regulatory authority for, any other  
14 pending surface coal mining operation permit application filed by the person in any state in the  
15 United States.

16 (4) For any surface coal mining operation owned or controlled by either the applicant or by  
17 any person who owns or controls the applicant, the operation's:

18 (a) Name, address, identifying numbers, including employer identification number, federal  
19 or state permit number, and MSHA number, the date of issuance of the MSHA number, and the  
20 regulatory authority; and

21 (b) Ownership or control relationship to the applicant, including percentage of ownership  
22 and location in organizational structure.

23 (5) The names and addresses of:

1 (a) Every legal or equitable owner of record of the property to be mined;

2 (b) The holders of record of any leasehold interest in the property to be mined; and

3 (c) Any purchaser of record, under a real estate contract, of the property to be mined.

4 (6) The names and addresses of the owners of record of all surface and subsurface areas  
5 contiguous to any part of the proposed permit area.

6 (7) The name of the proposed mine and all MSHA identification numbers that have been  
7 assigned for the mine and all mine associated structures that require MSHA approval.

8 (8) Proof, such as a power of attorney or a resolution of the board of directors, that the  
9 individual signing the application has the power to represent the applicant in the permit matter.

10 (9) A statement of all lands, interests in lands, options, or pending bids on interests held or  
11 made by the applicant for lands which are contiguous to the area to be covered by the permit.

12 (10) After an applicant has been notified that his or her application has been approved, but  
13 before the permit is issued, the applicant shall, as applicable, update, correct, or indicate that no  
14 change has occurred in the information previously submitted under subsections (1) through (4) of  
15 this section.

16 (11) The permittee shall, in writing, inform the cabinet of any change of the permittee's  
17 address immediately if changed at any point prior to final bond release.

18 (12) The permittee shall submit updates of the following information in writing to the  
19 cabinet within thirty (30) days of the effective date of any change. Updates shall be submitted for  
20 any changes that occur at any point prior to final bond release. Failure to submit updated  
21 information shall constitute a violation of KRS Chapter 350 only upon the permittee's refusal or  
22 failure to timely submit, as determined by the cabinet, the information to the cabinet upon request.  
23 After the permittee's refusal or failure to timely submit the information to the cabinet upon request,

1 the cabinet may suspend the permit after opportunity for hearing pending compliance with this  
2 subsection:

3 (a) The names and addresses of every officer, partner, director, or person performing a  
4 function similar to a director of the permittee;

5 (b) The names and addresses of principal shareholders; and

6 (c) Whether the permittee or other persons specified in this subsection are subject to any of  
7 the provisions of KRS 350.130(3).

8 Section 3. Violation Information. Each application shall contain the following information:

9 (1) A statement of whether the applicant or any subsidiary, affiliate, or persons controlled  
10 by or under common control with the applicant has:

11 (a) Had a coal mining permit of the United States or any state suspended or revoked in the  
12 five (5) years preceding the date of submission of the application; or

13 (b) Forfeited a coal mining performance bond or similar security deposited in lieu of bond.

14 (2) If any suspension, revocation, or forfeiture as described in subsection (1) of this section  
15 has occurred, the application shall contain a statement of the facts involved, including:

16 (a) Identification number and date of issuance of the permit, and date and amount of bond  
17 or similar security;

18 (b) Identification of the authority that suspended or revoked the permit or forfeited the bond  
19 and the stated reasons for that action;

20 (c) The current status of the permit, bond, or similar security involved;

21 (d) The date, location, and type of any administrative or judicial proceedings initiated  
22 concerning the suspension, revocation, or forfeiture; and

23 (e) The current status of these proceedings.

(3) For any violation of a provision of SMCRA, federal regulations enacted pursuant to SMCRA, KRS Chapter 350 and administrative regulations adopted pursuant thereto, any other state's laws or regulations under SMCRA, any federal law, rule, or regulation pertaining to air or water environmental protection, or any Kentucky or other state's law, rule, or regulation enacted pursuant to federal law, rule, or regulation pertaining to air or water environmental protection incurred in connection with any surface coal mining operation, a list of all violation notices received by the applicant during the three (3) year period preceding the application date, and a list of all unabated cessation orders and unabated air and water quality violation notices received prior to the date of the application by any surface coal mining and reclamation operation owned or controlled by either the applicant or by any person who owns or controls the applicant. For each violation notice or cessation order reported, the lists shall include the following information, as applicable:

(a) Any identifying numbers for the operation, including the federal or state permit number and MSHA number, the dates of issuance of the violation notice and MSHA number, the name of the person to whom the violation notice was issued, and the name of the issuing regulatory authority, department, or agency;

(b) A brief description of the particular violation alleged in the notice;

(c) The final resolution of each violation notice, if any;

(d) For each violation notice that has not been finally resolved:

1. The date, location, and type of any administrative or judicial proceedings initiated concerning the violation, including proceedings initiated by any person identified in this subsection to obtain administrative or judicial review of the violation; and

2. The current status of the proceedings and of the violation notice; and

1           3. The actions, if any, taken or being taken by any person identified in this subsection to  
2   abate the violation.

3           (4) After an applicant has been notified that his or her application has been approved, but  
4   before the permit is issued, the applicant shall, as applicable, update, correct, or indicate that no  
5   change has occurred in the information previously submitted under subsections (1) through (3) of  
6   this section.

7           (5) Upon request by a small operator the cabinet shall provide to the small operator, with  
8   regard to persons under subsection (1) of this section which are identified by the small operator, the  
9   compliance information required by this section regarding suspension and revocation of permits  
10   and forfeiture of bonds under KRS Chapter 350, and information pertaining to violations of KRS  
11   Chapter 350 and administrative regulations promulgated thereunder.

12          Section 4. Right of Entry and Right to Surface Mine. (1) Each application shall contain a  
13   description of the documents upon which the applicant bases his or her legal right to enter and  
14   begin surface mining activities in the permit area and whether that right is the subject of pending  
15   litigation. The description shall identify those documents by type and date of execution, identify  
16   the specific lands to which the document pertains, and explain the legal rights claimed by the  
17   applicant.

18          (2) If the private mineral estate to be mined has been severed from the private surface  
19   estate, the application shall contain:

20          (a) A copy of the written consent of the surface owner for the extraction of coal by surface  
21   mining methods; [or]

22          (b) A copy of the conveyance that expressly grants or reserves the right to extract coal by  
23   surface mining methods; or

1 (c) If the conveyance does not expressly grant the right to extract the coal by surface  
2 mining methods, the surface-subsurface legal relationship shall be determined in accordance with  
3 applicable state law, provided that nothing in this administrative regulation shall be construed to  
4 authorize the regulatory authority to adjudicate property rights disputes. [~~a copy of the original~~  
5 ~~instrument of severance upon which the applicant bases his right to extract coal by surface mining~~  
6 ~~methods and documentation that under applicable state law, the applicant has the legal authority to~~  
7 ~~extract the coal by those methods.~~]

8 Section 5. Relationship to Areas Designated Unsuitable for Mining. (1) Each application  
9 shall contain a statement of available information on whether the proposed permit area is within an  
10 area designated unsuitable for surface mining activities under 405 KAR Chapter 24 or under study  
11 for designation in an administrative proceeding under that chapter.

12 (2) If an applicant claims the exemption in 405 KAR 8:010, Section 14(4)(b), the  
13 application shall contain information supporting the applicant's assertion that it made substantial  
14 legal and financial commitments before January 4, 1977, concerning the proposed surface mining  
15 activities.

16 (3) If an applicant proposes to conduct surface mining activities within 300 feet of an  
17 occupied dwelling, the application shall contain the waiver of the owner of the dwelling as required  
18 in 405 KAR 24:040, Section 2(5).

19 (4) If the applicant proposes to conduct surface mining activities within 100 feet of a public  
20 road, the requirements of 405 KAR 24:040, Section 2(6) shall be met.

21 Section 6. Permit Term Information. (1) Each application shall state the anticipated or  
22 actual starting and termination date of each phase of the surface mining activities and the

1 anticipated number of acres of land to be affected for each phase of mining and over the total life  
2 of the permit.

3 (2) If the applicant proposes to conduct the surface mining activities in excess of five (5)  
4 years, the application shall contain the information needed for the showing required under 405  
5 KAR 8:010, Section 17(1).

6 Section 7. Personal Injury and Property Damage Insurance Information. Each permit  
7 application shall contain a certificate of liability insurance according to 405 KAR 10:030, Section  
8 4.

9 Section 8. Identification of Other Licenses and Permits. Each application shall contain a list  
10 of all other licenses and permits needed by the applicant to conduct the proposed surface mining  
11 activities. This list shall identify each license and permit by:

12 (1) Type of permit or license;

13 (2) Name and address of issuing authority;

14 (3) Identification numbers of applications for those permits or licenses or, if issued, the  
15 identification numbers of the permits or licenses; and

16 (4) If a decision has been made, the date of approval or disapproval by each issuing  
17 authority.

18 Section 9. Identification of Location of Public Office for Filing of Application. Each  
19 application shall identify, by name and address, the appropriate regional office of the cabinet where  
20 the applicant will file a copy of the entire application for public inspection under 405 KAR 8:010,  
21 Section 8(8).

22 Section 10. Newspaper Advertisement and Proof of Publication. A copy of the newspaper  
23 advertisement of the application for a permit, major revision, amendment, transfer, or renewal of a

1 permit and proof of publication of the advertisement, which is acceptable to the cabinet, shall be  
2 filed with the cabinet and made a part of the application, not later than fifteen (15) days after the  
3 last date of publication required under 405 KAR 8:010, Section 8(2).

4 Section 11. Environmental Resources Information. (1) Each permit application shall  
5 include descriptions of the existing environmental resources within the proposed permit area and  
6 adjacent areas as required by Sections 11 through 23 of this administrative regulation. The  
7 descriptions required by this administrative regulation may, where appropriate, be based upon  
8 published texts or other public documents together with reasonable extrapolations from specific  
9 data available from existing permit areas or other appropriate areas.

10 (2)(a) Each application shall describe and identify the nature of cultural, historic, and  
11 archaeological resources listed or eligible for listing on the National Register of Historic Places and  
12 known archaeological sites within the proposed permit area and adjacent areas. The description  
13 shall be based on all available information, including information from the state Historic  
14 Preservation Officer and from local archaeological, historical, and cultural preservation agencies.

15 (b) The cabinet may require the applicant to identify and evaluate important historic and  
16 archaeological resources that may be eligible for listing on the National Register of Historic Places,  
17 through collection of additional information, field investigations, or other appropriate analyses.

18 Section 12. General Requirements for Baseline Geologic and Hydrologic Information. (1)  
19 The application shall contain baseline geologic and hydrologic information which has been  
20 collected, analyzed, and submitted in the detail and manner acceptable to the cabinet, and which  
21 shall be sufficient to:

22 (a) Identify and describe protective measures pursuant to Section 32(1) of this  
23 administrative regulation which will be implemented during the mining and reclamation process to

1 assure protection of the hydrologic balance, or to demonstrate that protection of the hydrologic  
2 balance can be assured without the design and installation of protective measures; and to design  
3 necessary protective measures pursuant to Section 32(2) of this administrative regulation;

4 (b) Determine the probable hydrologic consequences of the mining and reclamation  
5 operations upon the hydrologic balance in the permit area and adjacent area pursuant to Section  
6 32(3) of this administrative regulation so that an assessment can be made by the cabinet pursuant to  
7 405 KAR 8:010, Section 14(3) of the probable cumulative impacts of all anticipated mining on the  
8 hydrologic balance in the cumulative impact area;

9 (c) Determine pursuant to 405 KAR 8:010, Section 14(2) and (3) whether reclamation as  
10 required by 405 KAR can be accomplished and whether the proposed operation has been designed  
11 to prevent material damage to the hydrologic balance; and

12 (d) Design surface and groundwater monitoring systems pursuant to Section 32(4) of this  
13 administrative regulation for the during-mining and postmining time period which, together with  
14 the baseline data collected under Sections 14(1) and 15(1) of this administrative regulation, will  
15 demonstrate whether the mining operation is meeting applicable effluent limitations and stream  
16 standards and protecting the hydrologic balance.

17 (2)(a) Geologic and hydrologic information pertaining to the area outside the permit and  
18 adjacent area but within the cumulative impact assessment area shall be provided to the applicant  
19 by the cabinet:

- 20 1. If this information is needed in preparing the cumulative impact assessment; and
- 21 2. If this information is available from an appropriate federal or state agency.

(b) If this information is needed by the cabinet for conducting the cumulative impact assessment and is not available from a federal or state agency, the applicant may gather and submit this information to the cabinet as part of the permit application.

(3) Interpolation, modeling, correlation or other statistical methods, and other data extrapolation techniques may be used if the applicant can demonstrate to the satisfaction of the cabinet that the data extrapolation techniques are valid and that information obtained through the techniques meets the requirements of subsection (1) of this section.

(4) Water quality analysis and sampling required by this chapter shall be conducted according to:

(a) Standard Methods for the Examination of Water and Wastewater (14th Edition); or

(b) 40 CFR Parts 136 and 434.

Section 13. Baseline Geologic Information. (1) The application shall contain baseline geologic information collected from the permit area which shall meet the requirements of Section 12(1) of this administrative regulation and shall include at a minimum:

(a) The results of samples obtained from continuous cores; drill cuttings; channel cuttings from fresh, unweathered, rock outcrops; or other rock or soil material which has been collected using acceptable sampling techniques.

1. The vertical extent of sampling shall include those strata from the surface down to and including the stratum immediately below the lowest coal seam to be mined; and

2. Where aquifers which are located within the permit area underlie the lowest coal seam to be mined and these aquifers may be adversely affected by the mining operation, the vertical extent of sampling shall also include those strata from the lowest coal seam to be mined down to and including the aquifers.

1           3. The area and vertical density of sampling shall, at a minimum, be sufficient to determine  
2 the distribution of strata which have a potential to produce acid drainage and to determine the area  
3 and vertical extent of aquifers which may be adversely affected.

4           4. If the vertical extent, and the area and vertical density of sampling specified in  
5 subparagraphs 1 through 3 of this paragraph are not sufficient to locate suitable strata for use as a  
6 topsoil substitute, or for other required design or analysis, additional sampling shall be conducted  
7 as necessary to furnish adequate geologic information.

8           (b) Chemical analyses including maximum potential acidity and neutralization potential of  
9 each overburden stratum and the stratum immediately below the lowest coal seam to be mined, to  
10 identify those strata which have a potential to produce acid or toxic drainage.

11           (c) Chemical analyses of the coal seam to be mined to determine the potential to produce  
12 acid or toxic drainage, including the parameters of total sulfur and pyritic sulfur; except that the  
13 cabinet shall not require an analysis for pyritic sulfur if the applicant can demonstrate to the  
14 satisfaction of the cabinet that an analysis for total sulfur provides adequate information to assure  
15 protection of the hydrologic balance.

16           (d) Collection of geologic information from the permit area as required in this subsection  
17 may be waived in whole or in part if:

18           1. The applicant can demonstrate to the satisfaction of the cabinet through geologic  
19 correlation or other procedures that information collected from outside the permit area is  
20 representative of the permit area and is sufficient to meet the requirements of Section 12(1) of this  
21 administrative regulation; or

22           2. Other information equivalent to that required by this subsection is available to the  
23 cabinet in a satisfactory form and is made a part of the permit application; and

1           3. The cabinet provides a written statement granting a waiver.

2           (2) The application shall contain a description of the geology of the proposed permit area  
3 and adjacent area which shall meet the requirements of Section 12(1) of this administrative  
4 regulation and be based on the information required in subsection (1) of this section or other  
5 appropriate geologic information. The description shall include, at a minimum, geologic logs,  
6 cross-sections, fence diagrams, or other appropriate illustrations and written descriptions depicting:

7           (a) Within the permit area:

8           1. The structural geology and lithology of overburden strata and the stratum immediately  
9 below the lowest coal seam to be mined;

10          2. The thickness and chemical characteristics of each overburden stratum and the stratum  
11 immediately below the lowest coal seam to be mined; and

12          3. Where aquifers may be adversely affected by the mining operation, the structural  
13 geology, lithology, thickness, and area extent of the aquifers; and structural geology and lithology  
14 of strata, and thickness of each stratum, from the surface down to the aquifers.

15          (b) Within the adjacent area, the approximate area extent and approximate thickness of  
16 aquifers which may be adversely affected by the mining operation.

17          (3) If determined by the cabinet to be necessary to assure adequate reclamation and  
18 protection of the hydrologic balance, the cabinet may require geologic information and description  
19 in addition to that required by subsections (1) and (2) of this section including leaching tests of  
20 material from strata which may be disturbed by the operation to determine the potential for the  
21 operation to produce drainage with elevated levels of acidity, sulfate, and total dissolved solids,  
22 and the collection of information to greater depths within the proposed permit area or the collection  
23 of information for areas outside the proposed permit area.

1           Section 14. Baseline Groundwater Information. (1) The application shall contain baseline  
2 groundwater information for the permit area and adjacent area which shall be collected and  
3 submitted in a manner acceptable to the cabinet and shall be adequate to meet the requirements of  
4 Section 12(1) of this administrative regulation.

5           (2) Groundwater information shall include an inventory of wells, springs, underground  
6 mines, or other similar groundwater supply facilities which are currently being used, have been  
7 used in the past, or have a potential to be used for domestic, agricultural, industrial, or other  
8 beneficial purpose. The inventory shall include the location, ownership, type of usage, and where  
9 possible, other relevant information such as the depth and diameter of wells and approximate rate  
10 of usage, pumpage or discharge from wells, springs, and other groundwater supply facilities.

11           (3) Groundwater information shall include seasonal groundwater quantity and quality data  
12 collected from monitoring wells, springs, underground mines, or other appropriate groundwater  
13 monitoring facilities, at a sufficient number of monitoring locations with adequate area distribution  
14 to meet the requirements of Section 12(1) of this administrative regulation. Seasonal groundwater  
15 quantity and quality data shall be provided for each water transmitting zone above, and potentially  
16 impacted water transmitting zone below, the lowest coal seam to be mined including at a  
17 minimum:

18           (a) Groundwater levels; and

19           (b) Total dissolved solids, or specific conductance corrected to twenty-five (25) degrees C;  
20 pH; dissolved iron; dissolved manganese; acidity; alkalinity; and sulfate. For data collected prior to  
21 August 13, 1985, total iron and total manganese may be substituted for dissolved iron and  
22 dissolved manganese.

1 (4) The groundwater information described in subsection (3) of this section shall be  
2 required in whole or in part for coal seams if the coal seams to be mined are serving as water  
3 supply sources or are otherwise significant in protecting the hydrologic balance.

4 (5) If additional information is needed to assess the need for protective measures, to design  
5 protective measures, to determine the probable hydrologic consequences of mining, or to conduct  
6 the cumulative impact assessment, the cabinet may require groundwater information in addition to  
7 that described in subsections (2), (3), and (4) of this section including information pertaining to  
8 aquifer storage, yield, discharge, recharge capacity, and additional water quality parameters.

9 Section 15. Baseline Surface Water Information. (1) The application shall contain baseline  
10 surface water information for the permit area and adjacent area which shall be collected and  
11 submitted in a manner acceptable to the cabinet and shall be adequate to meet the requirements of  
12 Section 12(1) of this administrative regulation.

13 (2) Surface water information shall include an inventory of all streams, lakes,  
14 impoundments or other surface water bodies in the permit and adjacent area which are currently  
15 being used for domestic, agricultural, industrial, or other beneficial purpose. The inventory shall  
16 include the name of the surface water body which is being used as a water supply source; the  
17 location, drainage area, ownership, and type of usage for the withdrawal; and where possible other  
18 relevant information such as the rate of withdrawal and seasonal variation.

19 (3) Surface water information shall include:

20 (a) The name, location, and ownership where appropriate, of all streams, lakes,  
21 impoundments, and other surface water bodies which receive run-off from watersheds which will  
22 be disturbed by the operation; and

(b) The location and description of any existing facilities located in watersheds which will be disturbed by the mining operation which may contribute to surface water pollution, such as existing or abandoned mining operations, oil wells, logging operations, or other similar facilities, including the location of any discharges which may be flowing from the facilities.

(4) Surface water information shall include seasonal quantity and quality data collected from a sufficient number of watersheds which will be disturbed by the operation with adequate area distribution to meet the requirements of Section 12(1) of this administrative regulation and include at a minimum:

(a) Flow rates; and

(b) Total dissolved solids, or specific conductance corrected to twenty-five (25) degrees C; total suspended solids; pH; total iron; total manganese; acidity; alkalinity; and sulfate.

(5) If additional information is needed to assess the need for protective measures, to design protective measures, to determine the probable hydrologic consequences of mining, or to conduct the cumulative impact assessment, the cabinet may require surface water information in addition to that described in subsections (2), (3), and (4) of this section including information pertaining to flood flows and additional water quality parameters.

Section 16. Alternative Water Supply Information. If the determination of probable hydrologic consequences required under Section 32 of this administrative regulation indicates that the proposed surface mining activities may proximately result in contamination, diminution, or interruption of an underground or surface source of water within the proposed permit area or adjacent area which is used for domestic, agricultural, industrial, or other legitimate use, then the application shall identify and describe the adequacy and suitability of the alternative sources of

1 water supply that could be developed for existing premining uses and approved postmining land  
2 uses.

3 Section 17. Climatological Information. (1) When requested by the cabinet, the application  
4 shall contain a statement of the climatological factors that are representative of the proposed permit  
5 area, including:

6 (a) The average seasonal precipitation;

7 (b) The average direction and velocity of prevailing winds; and

8 (c) Seasonal temperature ranges.

9 (2) The cabinet may request additional data as deemed necessary to ensure compliance with  
10 the requirements of this chapter.

11 Section 18. Soil Resources Information. (1) If soil survey information for the proposed  
12 permit area is available from SCS, the application shall include this information as a part of the  
13 description of premining land use capability and productivity required by Section 22(1)(b) of this  
14 administrative regulation.

15 (2) Where the applicant proposes to use selected overburden materials as a supplement or  
16 substitute for topsoil, the application shall provide results of analyses, trials, and tests as required  
17 under 405 KAR 16:050, Section 2(5).

18 Section 19. Vegetation Information. (1) The permit application shall, as required by the  
19 cabinet, contain a map that delineates existing vegetative types and a description of the plant  
20 communities within the proposed permit area and within any proposed reference area. This  
21 description shall include information adequate to predict the potential for reestablishing vegetation.

22 (2) When a map or aerial photograph is required, sufficient adjacent areas shall be included  
23 to allow evaluation of vegetation as important habitat for fish and wildlife.

1           Section 20. Fish and Wildlife Resources Information. (1) Each application shall include  
2 fish and wildlife resource information for the permit area and adjacent area. The scope and level of  
3 detail for this information shall be determined by the cabinet in consultation with the Kentucky  
4 Department of Fish and Wildlife Resources and the U.S. Department of the Interior, Fish and  
5 Wildlife Service, and shall be sufficient to design the protection and enhancement plan required  
6 under Section 36 of this administrative regulation.

7           (2) Site-specific resource information necessary to address the respective species or  
8 habitats shall be required when the permit area or adjacent area is likely to include:

9           (a) Listed or proposed endangered or threatened species of plants or animals or their critical  
10 habitats listed by the Secretary of the Interior under the Endangered Species Act of 1973, as  
11 amended (16 USC Sec. 1531 et seq.), or those species or habitats protected by similar state  
12 statutes;

13           (b) Habitats of unusually high value for fish and wildlife such as important streams,  
14 wetlands, riparian areas, cliffs supporting raptors, areas offering special shelter or protection,  
15 migration routes, or reproduction and wintering areas; or

16           (c) Other species or habitats identified through agency consultation as requiring special  
17 protection under state or federal law.

18           (3) Wetland delineations shall be conducted in accordance with:

19           (a) The Corps of Engineers Wetlands Delineation Manual;

20           (b) U. S. Army Corps of Engineers Regulatory Guidance Letter No. 90-7;

21           (c) National Lists of Plant Species that Occur in Wetlands and Biological Reports and  
22 Summary; and

23           (d) List of Hydric Soils of the United States, All Kentucky Counties.

1 (4) Upon request, the cabinet shall provide the resource information required under this  
2 section to the U.S. Department of the Interior, Fish and Wildlife Service regional or field office for  
3 their review. This information shall be provided within ten (10) days of receipt of the request from  
4 the Service.

5 (5)(a) Fish and wildlife resource information shall be required for amendments and  
6 revisions that:

- 7 1. Propose extension into a wetland;
- 8 2. Propose significant disturbance in a new watershed in which the permit area or adjacent  
9 area includes an important stream;
- 10 3. Seek to obtain a stream buffer zone variance under 405 KAR 16:060, Section 11, or seek  
11 to modify an existing stream buffer zone variance;
- 12 4. Propose extension of the permit boundary that involves a new surface disturbance of five  
13 (5) acres or more; or
- 14 5. Involve new permit or adjacent areas likely to contain, or that could reasonably be  
15 expected to contain, a state or federal endangered or threatened species or its critical habitat.

16 (b) For other amendments and revisions, a determination of whether fish and wildlife  
17 information is necessary, and the scope of information needed, shall be made on a case-by-case  
18 basis.

19 (6) This section shall apply to applications for permits, amendments and revisions  
20 submitted to the cabinet on or after November 17, 1992.

21 Section 21. Prime Farmland Investigation. (1) The applicant shall before making  
22 application investigate the proposed permit area to determine whether lands within the area may be  
23 prime farmland.

1 (2) Land shall not be considered prime farmland where the applicant can demonstrate, to  
2 the satisfaction of the cabinet, one (1) of the following:

3 (a) The land has not been historically used as cropland;

4 (b) The slope of the land is ten (10) percent or greater;

5 (c) Other relevant factors exist, which would preclude the soils from being defined as prime  
6 farmland according to 7 CFR 657, such as a very rocky surface, or the land is flooded during the  
7 growing season more often than once in two (2) years, and the flooding has reduced crop yields; or

8 (d) On the basis of a soil survey of lands within the permit area, there are no soil map units  
9 that have been designated prime farmland by the U.S. SCS.

10 (3) If the investigation establishes that the lands are not prime farmland, the applicant shall  
11 submit with the permit application a request for a negative determination and results of the  
12 investigation which show that the land for which the negative determination is being sought meets  
13 one (1) of the criteria of subsection (2) of this section.

14 (4) If the investigation indicates that lands within the proposed permit area may be prime  
15 farmlands, the applicant shall contact the U.S. SCS to determine if a soil survey exists for those  
16 lands and whether the applicable soil map units have been designated as prime farmlands. If no soil  
17 survey has been made for the lands within the proposed permit area, the applicant shall request the  
18 SCS to conduct a soil survey.

19 (a) If a soil survey of lands within the proposed permit area contains soil map units which  
20 have been designated as prime farmlands, the applicant shall submit an application, in accordance  
21 with 405 KAR 8:050, Section 3 for the designated land.

22 (b) If a soil survey for lands within the proposed permit area contains no soil map units  
23 which have been designated as prime farmland after review by the U.S. SCS, the applicant shall

1 submit with the permit application a request for negative determination under subsection (2)(d) of  
2 this section for the nondesignated land.

3 (5) The cabinet shall decide to grant or deny a negative determination based upon  
4 documentation provided by the applicant and any other pertinent information, such as cropping  
5 history, available to the cabinet from other sources.

6 (6) The cabinet shall consult with the SCS in deciding on a request for negative  
7 determination under subsection (2)(c) of this section.

8 (7) The cabinet shall examine any records on crop history available from the Agriculture  
9 Stabilization and Conservation Service when deciding on a request for negative determination  
10 under subsection (2)(a) of this section.

11 Section 22. Land-use Information. (1) The application shall contain a statement of the  
12 condition, capability, and productivity of the land within the proposed permit area, including:

13 (a) A map and supporting narrative of the uses of the land existing when the application is  
14 filed. If the premining use of the land was changed within five (5) years before the date of  
15 application, the historic use of the land shall also be described.

16 (b) A narrative of land use capability and productivity, which analyzes the land-use  
17 description in conjunction with other environmental resources information required under this  
18 administrative regulation. The narrative shall provide analyses of:

19 1. The capability of the land before any mining to support a variety of uses, giving  
20 consideration to soil and foundation characteristics, topography, vegetative cover and the  
21 hydrology of the proposed permit area; and

22 2. The productivity of the proposed permit area before mining, expressed as average yield  
23 of food, fiber, forage, or wood products from the lands obtained under high levels of management.

1 The productivity shall be determined by yield data or estimates for similar sites based on current  
2 data from the U.S. Department of Agriculture, state agricultural universities or appropriate state  
3 natural resource or agricultural agencies.

4 (2) The application shall state whether the proposed permit area has been previously mined,  
5 and, if so, the following information, if available:

6 (a) The type of mining method used;

7 (b) The coal seams or other mineral strata mined;

8 (c) The extent of coal or other minerals removed;

9 (d) The approximate dates of past mining; and

10 (e) The uses of the land preceding mining.

11 (3) The application shall contain a description of the existing land uses and local  
12 government land use classifications, if any, of the proposed permit area and adjacent areas.

13 (4) The application shall contain a description identifying the extent to which cities, towns,  
14 and municipalities, or parts thereof, are located within the proposed permit area.

15 Section 23. Maps and Drawings. (1) The permit application shall include a map or maps  
16 showing:

17 (a) The boundaries of all subareas which are proposed to be affected over the estimated  
18 total life of the proposed surface mining activities, with a description of the size, sequence, and  
19 timing of the surface mining operations for which it is anticipated that additional permits will be  
20 sought;

21 (b) Any land within the proposed permit area and adjacent area which is within the  
22 boundaries of any units of the National System of Trails or the Wild and Scenic Rivers System,  
23 including study rivers designated under Section 5(a) of the Wild and Scenic Rivers Act (16 USC

1 1276(a)), or which is within the boundaries of a wild river established pursuant to KRS Chapter  
2 146;

3 (c) The boundaries of any public park and locations of any cultural or historical resources  
4 listed on or eligible for listing on the National Register of Historic Places and known  
5 archaeological sites within the permit area and adjacent areas;

6 (d) The locations of water supply intakes for current users of surface water within a  
7 hydrologic area defined by the cabinet, and those surface waters which will receive discharges  
8 from affected areas in the proposed permit area;

9 (e) All boundaries of lands and names of present owners of record of those lands, both  
10 surface and subsurface, included in or contiguous to the permit area;

11 (f) The boundaries of land within the proposed permit area upon which the applicant has  
12 the legal right to enter and begin surface mining activities;

13 (g) The location of surface and subsurface manmade features within, passing through, or  
14 passing over the proposed permit area, including major electric transmission lines, pipelines, and  
15 agricultural drainage tile fields;

16 (h) The location and boundaries of any proposed reference areas for determining the  
17 success of revegetation for the permit area;

18 (i) The location of all buildings on and within 1,000 feet of the proposed permit area, with  
19 identification of the current use of the buildings;

20 (j) Each public road located in or within 100 feet of the proposed permit area;

21 (k) Each cemetery that is located in or within 100 feet of the proposed permit area;

22 (l) Other relevant information required by the cabinet.

23 (2) The application shall include drawings, cross sections, and maps showing:

1 (a) Elevations and locations of test borings and core samplings;

2 (b) Elevations and locations of monitoring stations or other sampling points in the permit  
3 area and adjacent areas used to gather data on water quality and quantity, fish and wildlife, and air  
4 quality, if required, in preparation of the application, or which will be used for this data gathering  
5 during the term of the permit;

6 (c) Nature, depth, and thickness of the coal seams to be mined, any coal or rider seams  
7 above the seam to be mined, each stratum of the overburden, and the stratum immediately below  
8 the lowest coal seam to be mined, for the permit area;

9 (d) All coal crop lines and the strike and dip of the coal to be mined within the proposed  
10 permit area;

11 (e) Location and extent of known workings of active, inactive, or abandoned underground  
12 mines, including mine openings to the surface within the proposed permit area and adjacent areas;

13 (f) Location and extent of subsurface water, if encountered, within the proposed permit area  
14 or adjacent areas;

15 (g) Location of surface water bodies such as streams, lakes, ponds, springs, constructed or  
16 natural drainage patterns, and irrigation ditches within the proposed permit area and adjacent areas;

17 (h) Location and extent of existing or previously surface-mined areas within the proposed  
18 permit area;

19 (i) Location, and depth if available, of gas and oil wells within the proposed permit area  
20 and water wells in the permit area and adjacent areas;

21 (j) Location and dimensions of existing areas of spoil, waste, and noncoal waste disposal,  
22 dams, embankments, other impoundments, and water treatment and air pollution control facilities  
23 within the proposed permit area;

1 (k) Sufficient slope measurements to adequately represent the existing land surface  
2 configuration of the proposed permit area, measured and recorded according to the following:

3 1. Each measurement shall consist of an angle of inclination along the prevailing slope  
4 extending 100 linear feet above and below or beyond the coal outcrop or the area to be disturbed  
5 or, where this is impractical, at locations and in a manner as specified by the cabinet.

6 2. Where the area has been previously mined, the measurements shall extend at least 100  
7 feet beyond the limits of mining disturbances, or any other distance determined by the cabinet to be  
8 representative of the premining configuration of the land.

9 3. Slope measurements shall take in account natural variations in slope, to provide accurate  
10 representation of the range of natural slopes and reflect geomorphic differences of the area to be  
11 disturbed.

12 (3) The permit application shall include the map information specified in Sections 22(1)(a),  
13 24(3), 24(4)(c), 24(4)(h), 27(1), 28(1), 31, 32, 33, 34, and 38 of this administrative regulation, and  
14 405 KAR 8:010, Section 5(6).

15 (4) Maps, drawings, and cross-sections included in a permit application which are required  
16 by this section shall be prepared by or under the direction of and certified by a qualified registered  
17 professional engineer, and shall be updated as required by the cabinet. The qualified registered  
18 professional engineer shall not be required to certify true ownership of property.

19 Section 24. Mining and Reclamation Plan; General Requirements. (1) Each application  
20 shall contain a detailed mining and reclamation plan (MRP) for the proposed permit area as set  
21 forth in this section through Section 38 of this administrative regulation, showing how the  
22 applicant will comply with KRS Chapter 350 and 405 KAR Chapters 16 through 20.

1 (2) Each application shall contain a description of the mining operations proposed to be  
2 conducted within the proposed permit area, including, at a minimum, the following:

3 (a) A narrative description of the type and method of coal mining procedures and proposed  
4 engineering techniques, anticipated annual and total production of coal, by tonnage, and the major  
5 equipment to be used for all aspects of those operations; and

6 (b) A narrative explaining the construction, modification, use, maintenance, and removal of  
7 the following facilities (unless retention of the facilities is to be approved as necessary for  
8 postmining land use as specified in 405 KAR 16:210):

9 1. Dams, embankments, and other impoundments;

10 2. Overburden and topsoil handling and storage areas and structures;

11 3. Coal removal, handling, storage, cleaning, and transportation areas and structures;

12 4. Spoil, coal processing waste, and noncoal waste removal, handling, storage,  
13 transportation, and disposal areas and structures;

14 5. Mine facilities; and

15 6. Water and air pollution control facilities.

16 (3) Each application shall contain plans and maps of the proposed permit area and adjacent  
17 areas as follows:

18 (a) The plans and maps shall show the lands proposed to be affected throughout the  
19 operation and any change in a facility or feature to be caused by the proposed operations, if the  
20 facility or feature was shown under Section 23 of this administrative regulation.

21 (b) The following shall be shown for the proposed permit area:

22 1. Buildings, utility corridors and facilities to be used;

2. The area of land to be affected within the proposed permit area, according to the sequence of mining and reclamation;

3. Each area of land for which a performance bond or other equivalent guarantee will be posted under 405 KAR Chapter 10;

4. Each coal storage, cleaning and loading area;

5. Each topsoil, spoil, coal waste, and noncoal waste storage area;

6. Each water diversion, collection, conveyance, treatment, storage, and discharge facility to be used;

7. Each air pollution collection and control facility;

8. Each source of waste and each waste disposal facility relating to coal processing or pollution control;

9. Each facility to be used to protect and enhance fish and wildlife and related environmental values;

10. Each explosive storage and handling facility; and

11. Location of each sedimentation pond, permanent water impoundment, coal processing waste bank, and coal processing waste dam and embankment, in accordance with Section 34 of this administrative regulation, and fill area for the disposal of excess spoil in accordance with Section 27 of this administrative regulation.

(c) Plans, maps, and drawings required under this section shall be prepared by, or under the direction of, and certified by a qualified registered professional engineer.

(4) Each plan shall contain the following information for the proposed permit area:

(a) A projected timetable for the completion of each major step in the mining and reclamation plan;

1 (b) A detailed estimate of the cost of reclamation of the proposed operations required to be  
2 covered by a performance bond under 405 KAR Chapter 10, with supporting calculations for the  
3 estimates;

4 (c) A plan for backfilling, soil stabilization, compacting, and grading, with contour maps or  
5 cross-sections that show the anticipated final surface configuration of the proposed permit area, in  
6 accordance with 405 KAR 16:190;

7 (d) A plan for removal, storage, and redistribution of topsoil, subsoil, and other material to  
8 meet the requirements of 405 KAR 16:050 including a demonstration of suitability of any  
9 proposed topsoil substitutes or supplements;

10 (e) A plan for revegetation as required in 405 KAR 16:200, including descriptions of the:  
11 schedule of revegetation; species and amounts per acre of seeds and seedlings to be used; methods  
12 to be used in planting and seeding; mulching techniques; irrigation, if appropriate; pest and disease  
13 control measures, if any; and measures proposed to be used to determine the success of  
14 revegetation as required in 405 KAR 16:200, Section 6; and a soil testing plan for evaluation of the  
15 results of topsoil handling and reclamation procedures related to revegetation;

16 (f) A description of the measures to be used to maximize the use and conservation of the  
17 coal resource as required in 405 KAR 16:010, Section 2;

18 (g) A description of measures to be employed to ensure that all debris, acid-forming and  
19 toxic-forming materials, and materials constituting a fire hazard are disposed of in accordance with  
20 405 KAR 16:150, and 405 KAR 16:190, Section 3, and a description of the contingency plans  
21 which have been developed to preclude sustained combustion of the materials;

22 (h) A description, including appropriate maps and drawings, of the measures to be used to  
23 seal or manage mine openings, and to plug, case, or manage exploration holes, other bore holes,

1 wells, and other openings within the proposed permit area, in accordance with 405 KAR 16:040;  
2 and

3 (i) A description of steps to be taken to comply with the requirements of the Clean Air Act  
4 (42 USC 7401 et seq.), the Clean Water Act (33 USC 1251 et seq.), and other applicable air and  
5 water quality laws and regulations and health and safety standards. This description shall, at a  
6 minimum, consist of identification of permits or approvals required by these laws and regulations  
7 which the applicant either has obtained, has applied for, or intends to apply for.

8 Section 25. MRP; Existing Structures. (1) Each application shall contain a description of  
9 each existing structure proposed to be used in connection with or to facilitate the surface coal  
10 mining and reclamation operation. The description shall include:

11 (a) Location;

12 (b) Plans of the structure which describe its current condition;

13 (c) Approximate dates on which construction of the existing structure was begun and  
14 completed; and

15 (d) A showing, including relevant monitoring data or other evidence, whether the structure  
16 meets the performance standards of 405 KAR Chapters 16 through 20 or, if the structure does not  
17 meet those performance standards, a showing whether the structure meets the performance  
18 standards of the interim performance standards of 405 KAR Chapter 1.

19 (2) Each application shall contain a compliance plan for each existing structure proposed to  
20 be modified or reconstructed for use in connection with or to facilitate the surface coal mining and  
21 reclamation operation. The compliance plan shall include:

22 (a) Design specifications for the modification or reconstruction of the structure to meet the  
23 performance standards of 405 KAR Chapters 16 through 20;

1 (b) A construction schedule which shows dates for beginning and completing interim steps  
2 and final reconstruction;

3 (c) Provisions for monitoring the structure as required by the cabinet to ensure that the  
4 performance standards of 405 KAR Chapters 16 through 20 are met; and

5 (d) A showing that the risk of harm to the environment or to public health or safety will not  
6 be significant during the period of modification or reconstruction.

7 Section 26. MRP; Blasting. (1) Each application shall contain a blasting plan for the  
8 proposed permit area explaining how the applicant intends to comply with the requirements of 405  
9 KAR 16:120. This plan shall include, at a minimum, information setting forth the limitations the  
10 permittee will meet with regard to ground vibration and airblast, the bases for the ground vibration  
11 and airblast limitations, and the methods to be applied in controlling the adverse effects of blasting  
12 operations.

13 (2) Each application shall contain a description of the systems to be used to monitor  
14 compliance with the standards for ground vibration and airblast including identification of the  
15 types, capabilities, and sensitivities of blast monitoring equipment and identification of the  
16 monitoring procedures and locations.

17 (3) Blasting operations within 500 feet of active underground mines shall require approval  
18 of the cabinet, MSHA, and the Office of Mine Safety and Licensing.

19 Section 27. MRP; Disposal of Excess Spoil. (1) Each application shall contain descriptions,  
20 including appropriate maps and cross-section drawings, of the proposed disposal site and design of  
21 the spoil disposal structures according to 405 KAR 16:130. These plans shall describe the  
22 geotechnical investigation, design, construction, operation, maintenance, and removal if  
23 appropriate, of the site and structures.

1 (2) Each application shall contain the results of a geotechnical investigation of the proposed  
2 disposal site, including the following:

3 (a) The character of bedrock and any adverse geologic conditions in the disposal area;

4 (b) A survey identifying all springs, seepage, and groundwater flow observed or anticipated  
5 during wet periods in the area of the disposal site;

6 (c) An assessment of the potential effects of subsidence of the subsurface strata due to past  
7 and future mining operations;

8 (d) A technical description of the rock materials to be utilized in the construction of those  
9 disposal structures containing rock chimney cores or underlain by a rock drainage blanket; and

10 (e) A stability analysis including strength parameters, pore pressures and long-term seepage  
11 conditions. These data shall be accompanied by a description of all engineering design  
12 assumptions and calculations and the alternatives considered in selecting the specific design  
13 specifications and methods.

14 (3) If, under 405 KAR 16:130, Section 1(4), rock toe buttresses or key way cuts are  
15 required, the application shall include the following:

16 (a) The number, location, and depth of borings or test pits which shall be determined with  
17 respect to the size of the spoil disposal structure and subsurface conditions; and

18 (b) Engineering specifications utilized to design the rock toe buttresses or key way cuts  
19 which shall be determined in accordance with subsection (2)(e) of this section.

20 Section 28. MRP; Transportation Facilities. (1) Each application shall contain a  
21 transportation facilities plan including a description of each road, conveyor, or rail system to be  
22 constructed, used, or maintained within the proposed permit area. The description shall include a  
23 map, appropriate cross-sections, and the following:

1 (a) Specifications for each road width, road gradient, road surface, road cut, fill  
2 embankment, culvert, bridge, drainage ditch, and drainage structure.

3 (b) A report of appropriate geotechnical analysis, where approval of the cabinet is required  
4 for alternative specifications, or for steep cut slopes under 405 KAR 16:220.

5 (c) A description of measures to be taken to obtain approval of the cabinet for alteration or  
6 relocation of a natural drainageway under 405 KAR 16:220.

7 (d) A description of measures, other than use of a rock headwall, to be taken to protect the  
8 inlet end of a ditch relief culvert, for approval by the cabinet under 405 KAR 16:220.

9 (2) Each plan shall contain a general description of each road, conveyor, or rail system to  
10 be constructed, used, or maintained within the proposed permit area.

11 Section 29. MRP; Surface Mining Near Underground Mining. For surface mining activities  
12 within the proposed permit area to be conducted within 500 feet of an underground mine, the  
13 application shall describe the measures to be used to comply with 405 KAR 16:010, Section 3.

14 Section 30. MRP; Protection of Public Parks and Historic Places. (1) For any publicly-  
15 owned parks or any places listed on the National Register of Historic Places that may be adversely  
16 affected by the proposed operations, each plan shall describe the measures to be used to prevent  
17 adverse impact; or, if valid existing rights exist or joint agency approval is to be obtained under  
18 405 KAR 24:040, Section 2(4), to minimize adverse impacts.

19 (2) The cabinet may require the applicant to protect historic or archaeological properties  
20 listed or eligible for listing on the National Register of Historic Places through appropriate  
21 mitigation and treatment measures. These measures need not be completed prior to permit  
22 issuance, but shall be completed before the properties are affected by surface mining activities.

1           Section 31. MRP; Protection of Public Roads. Each application shall describe, with  
2 appropriate maps and drawings, the measures to be used to ensure that the interests of the public  
3 and landowners affected are protected if, under 405 KAR 24:040, Section 2(6), the applicant seeks  
4 to have the cabinet approve:

5           (1) Conducting the proposed surface mining activities within 100 feet of the right-of-way  
6 line of any public road, except where mine access or haul roads join that right-of-way; or

7           (2) Relocating a public road.

8           Section 32. MRP; Protection of the Hydrologic Balance. (1) Each application shall contain  
9 a description, as set forth in this subsection, of the measures to be taken to minimize disturbances  
10 to the hydrologic balance within the permit area and adjacent area and to prevent material damage  
11 to the hydrologic balance outside the permit area.

12          (a) The description shall be based upon the baseline geologic, hydrologic, and other  
13 information required by Sections 12 through 16 of this administrative regulation and other  
14 appropriate information, shall be specific to local hydrologic conditions, and shall be prepared in a  
15 manner and detail acceptable to the cabinet.

16          (b) The description shall identify the protective measures to be taken to enable the  
17 operation to meet, at a minimum, each of the hydrologic requirements referenced in this paragraph,  
18 or shall demonstrate to the satisfaction of the cabinet that protective measures are not necessary for  
19 the operation to meet the requirements:

20          1. Meet applicable water quality statutes, administrative regulations, standards, and effluent  
21 limitations as required by 405 KAR 16:060, Section 1(3);

22          2. Avoid acid or toxic drainage as required by 405 KAR 16:060, Sections 4, 5, and 6;

1           3. Control the discharge of sediment to streams located outside the permit area as required  
2 by 405 KAR 16:060, Section 2;

3           4. Control the drainage and discharge of water within the permit area as required by 405  
4 KAR 16:060, Sections 1(4), 3, 9, and 12, and 405 KAR 16:080;

5           5. Restore the approximate premining recharge capacity of the permit area as required by  
6 405 KAR 16:060, Section 5; and

7           6. Protect or replace the water supply of present users as required by 405 KAR 16:060,  
8 Section 8.

9           (c) The cabinet may require that the description include protective measures in addition to  
10 those identified under paragraph (b) of this subsection, if the cabinet determines that additional  
11 measures are needed to protect the hydrologic balance in accordance with 405 KAR 16:060.

12           (2) Each application shall include the design of any necessary protective measures  
13 identified under subsection (1) of this section. The design shall be prepared in a manner and detail  
14 acceptable to the cabinet including, as appropriate, calculations, maps, drawings, and written  
15 explanations as necessary to document the design.

16           (3) Each application shall include a determination of the probable hydrologic consequences  
17 of the mining and reclamation operations for the permit area and adjacent area.

18           (a) The determination shall be based upon the baseline geologic, hydrologic, and other  
19 information required by Sections 12 through 16 of this administrative regulation and other  
20 appropriate information, and may include information statistically representative of the site.

21           (b) The determination shall be completed according to the parameters and in the detail  
22 required by the cabinet to enable the cabinet to prepare a cumulative impact assessment, and shall  
23 take into account the anticipated effects of protective measures required by this chapter.

1 (c) For surface water systems, the determination shall, at a minimum, include probable  
2 impacts on:

- 3 1. Peak discharge rates, emphasizing the potential for flooding;
- 4 2. Settleable solids at peak discharge;
- 5 3. Low-flow discharge rates, emphasizing the potential for water supply diminution;
- 6 4. Suspended solids at low flow;
- 7 5. pH, at low flow, emphasizing the potential for acid drainage conditions, including  
8 depressed levels of alkalinity and elevated levels of iron, manganese, acidity, sulfate, and total  
9 dissolved solids or specific conductance, which are generally associated with acid drainage  
10 conditions.

11 (d) For groundwater systems, the determination shall, at a minimum, include probable  
12 impacts on:

- 13 1. Water quantity, emphasizing water levels and the potential for water supply diminution  
14 for existing users, and dewatering of aquifers which are not currently being used for water supply  
15 but have the potential to be developed as a water supply source.
- 16 2. pH, emphasizing the potential for acid drainage conditions, including depressed levels of  
17 alkalinity and elevated levels of iron, manganese, acidity, sulfate, and total dissolved solids or  
18 specific conductance, which are generally associated with acid drainage conditions.

19 (e) The determination shall include a finding on whether the proposed surface mining  
20 activities may proximately result in contamination, diminution or interruption of an underground or  
21 surface source of water within the permit area or adjacent areas that is used for domestic,  
22 agricultural, industrial or other legitimate use at the time the application is submitted.

1 (f) An application for a major revision to a permit shall be reviewed by the cabinet to  
2 determine whether a new or updated determination of the probable hydrologic consequences shall  
3 be required.

4 (4)(a) The application shall include a plan for the collection, recording, and reporting of  
5 groundwater and surface water quantity and quality data to monitor the effects of the mining and  
6 reclamation operations on the hydrologic balance, according to 405 KAR 16:110.

7 (b) The monitoring plan shall be based on the geologic and hydrologic baseline  
8 information, the mining and reclamation plan, and the determination of probable hydrologic  
9 consequences; and shall:

10 1. Identify the quantity and quality parameters to be monitored, sampling frequency, and  
11 monitoring site locations; and

12 2. Describe how the data may be used to determine the impacts of the operation on the  
13 hydrologic balance.

14 (5) An application for a major revision to a permit shall be reviewed by the cabinet to  
15 determine whether a new or updated cumulative hydrologic impact assessment shall be made.

16 Section 33. MRP; Diversions. Each application shall contain descriptions, including maps  
17 and cross-sections, of stream channel diversions and other diversions to be constructed within the  
18 proposed permit area to achieve compliance with 405 KAR 16:080.

19 Section 34. MRP; Impoundments and Embankments. (1) General. Each application shall  
20 include detailed design plans for each proposed sedimentation pond, water impoundment, and coal  
21 mine waste bank, dam, or embankment within the proposed permit area. Each plan shall:

22 (a) Be prepared by, or under the direction of, and certified by a qualified registered  
23 professional engineer;

(b) Contain a description, map, and appropriate cross-sections and drawings of the structure and its location;

(c) Contain all hydrologic and geologic information and computations necessary to demonstrate compliance with the design and performance standards of 405 KAR Chapter 16; and all information utilized by the applicant to determine the probable hydrologic consequences of the mining operations under Section 32(3) of this administrative regulation;

(d) Contain an assessment of the potential effect on the structure from subsidence of the subsurface strata resulting from past underground mining operations if underground mining has occurred;

(e) Include any geotechnical investigation, design, and construction requirements for the structure;

(f) Describe the operation and maintenance requirements for each structure; and

(g) Describe the timetable and plans to remove each structure, if appropriate.

(2) Sedimentation ponds. Sedimentation ponds, whether temporary or permanent, shall be designed in compliance with the requirements of 405 KAR 16:090 and 16.100.

(3) Permanent and temporary impoundments. Permanent and temporary impoundments shall be designed to comply with the requirements of 405 KAR 16:100. Each plan for an impoundment meeting the size or other criteria of MSHA, 30 CFR 77.216(a), shall comply with the requirements of 30 CFR 77.216-1 and 77.216-2. The plan required to be submitted to the district manager of MSHA under 30 CFR 77.216 shall be submitted to the cabinet as part of the permit application. After the plan has been approved by MSHA, the applicant shall submit to the cabinet a copy of the final approved plan, a copy of all correspondence from MSHA regarding the plan, a copy of any technical support documents requested by MSHA during its review, and a

1 notarized statement by the applicant that the copy submitted to the cabinet is a complete and  
2 correct copy of the final plan approved by MSHA.

3 (4) Coal mine waste banks. Coal mine waste banks shall be designed to comply with the  
4 requirements of 405 KAR 16:140.

5 (5) Coal mine waste dams and embankments. Coal mine waste dams and embankments  
6 shall be designed to comply with the requirements of 405 KAR 16:100 and 16:160. The plan for an  
7 impounding structure that is required to be submitted to the district manager of MSHA under 30  
8 CFR 77.216 shall be submitted to the cabinet as part of the permit application. After the plan has  
9 been approved by MSHA, the applicant shall submit to the cabinet a copy of the final approved  
10 plan, a copy of all correspondence from MSHA regarding the plan, a copy of any technical support  
11 documents requested by MSHA during its review, and a notarized statement by the applicant that  
12 the copy submitted to the cabinet is a complete and correct copy of the final plan approved by  
13 MSHA. Each plan shall comply with the requirements of MSHA, 30 CFR 77.216-1 and 77.216-2,  
14 and shall contain the results of a geotechnical investigation of the proposed dam or embankment  
15 foundation area, to determine the structural competence of the foundation which will support the  
16 proposed dam or embankment structure and the impounded material. The geotechnical  
17 investigation shall be planned and supervised by an engineer or engineering geologist, according to  
18 the following:

19 (a) The number, location, and depth of borings and test pits shall be determined using  
20 current prudent engineering practice for the size of the dam or embankment, quantity or material to  
21 be impounded, and subsurface conditions.

1 (b) The character of the overburden and bedrock, the proposed abutment sites, and any  
2 adverse geotechnical conditions which may affect the particular dam, embankment, or reservoir  
3 site shall be considered.

4 (c) All springs, seepage, and groundwater flow observed or anticipated during wet periods  
5 in the area of the proposed dam or embankment shall be identified on each plan.

6 (d) Consideration shall be given to the possibility of mud flows, rock-debris falls, or other  
7 landslides into the dam, embankment, or impounded material.

8 (6) If the structure is Class B-moderate hazard or Class C-high hazard under 405 KAR  
9 7:040, Section 5, and 401 KAR 4:030, or if the structure meets the size or other criteria of MSHA,  
10 30 CFR 77.216(a), each plan under subsections (2), (3), and (5) of this section shall include a  
11 stability analysis of the structure. The stability analysis shall include strength parameters, pore  
12 pressures, and long-term seepage conditions. The plan shall also contain a description of each  
13 engineering design assumption and calculation with a discussion of each alternative considered in  
14 selecting the specific design parameters and construction methods.

15 Section 35. MRP; Air Pollution Control. For all surface mining activities the application  
16 shall contain an air pollution control plan which includes the following:

17 (1) An air quality monitoring program, if required by the cabinet, to provide sufficient data  
18 to evaluate the effectiveness of the fugitive dust control practices under subsection (2) of this  
19 section to comply with applicable federal and state air quality standards; and

20 (2) A plan for fugitive dust control practices, as required under 405 KAR 16:170.

21 Section 36. MRP; Fish and Wildlife Protection and Enhancement. (1) Each application  
22 shall include a description of how, to the extent possible using the best technology currently  
23 available, the permittee will minimize disturbances and adverse impacts on fish and wildlife and

1 related environmental values, including compliance with the Endangered Species Act, during the  
2 surface coal mining and reclamation operations, and how enhancement of these resources will be  
3 achieved where practicable.

4 (2) This description shall:

5 (a) Apply, at a minimum, to species and habitats identified under Section 20 of this  
6 administrative regulation;

7 (b) Include protective measures that will be used during the active mining phase of  
8 operation. Protective measures may include the establishment of buffer zones, the selective  
9 location and special design of haul roads and powerlines, and the monitoring of surface water  
10 quality and quantity; and

11 (c) Include enhancement measures that will be used during the reclamation and postmining  
12 phase of operation to develop aquatic and terrestrial habitat. Enhancement measures may include  
13 restoration of streams and other wetlands, retention of ponds and impoundments, establishment of  
14 vegetation for wildlife food and cover, and the replacement of perches and nest boxes. If the plan  
15 does not include enhancement measures, a statement shall be given explaining why enhancement is  
16 not practicable.

17 (3) Upon request, the cabinet shall provide the protection and enhancement plan required  
18 under this section to the U.S. Department of the Interior, Fish and Wildlife Service regional or field  
19 office for their review. This information shall be provided within ten (10) days of receipt of the  
20 request from the Service.

21 (4)(a) A fish and wildlife protection and enhancement plan shall be required for  
22 amendments and revisions that:

23 1. Propose extension into a wetland;

2. Propose significant disturbance in a new watershed in which the permit area or adjacent area includes an important stream;

3. Seek to obtain a stream buffer zone variance under 405 KAR 16:060, Section 11, or seek to modify an existing stream buffer zone variance;

4. Propose extension of the permit boundary that involves a new surface disturbance of five (5) acres or more; or

5. Involve new permit or adjacent areas likely to contain, or that could reasonably be expected to contain, a state or federal endangered or threatened species or its critical habitat.

(b) For other amendments and revisions, a determination of whether a protection and enhancement plan is necessary shall be made on a case-by-case basis.

(5) This section shall apply to applications for permits, amendments and revisions submitted to the cabinet on or after November 17, 1992.

Section 37. MRP; Postmining Land Use. (1) Each plan shall contain a description of the proposed land use or uses following reclamation of the land within the proposed permit area, including:

(a) A discussion of the utility and capacity of the reclaimed land to support a variety of alternative uses, and the relationship of the proposed use to existing land use policies and plans;

(b) A discussion of how the proposed postmining land use is to be achieved and the necessary support activities which may be needed to achieve the proposed land use, including management practices to be conducted during the liability period for the commercial forest land, cropland (including hayland), and pastureland land uses;

(c) If a land use different from the premining land use is proposed, all supporting documentation required for approval of the proposed alternative use under 405 KAR 16:210;

1 (d) A discussion of the consideration which has been given to making all of the proposed  
2 surface mining activities consistent with surface owner plans and applicable state and local land  
3 use plans and programs; and

4 (e) A copy of the comments concerning the proposed use from the legal or equitable owner  
5 of record of the surface of the proposed permit area and the state and local government agencies, if  
6 any, which would have to initiate, implement, approve, or authorize the proposed use of the land  
7 following reclamation.

8 (2) Approval of the initial postmining land use plan pursuant to this section, shall not  
9 preclude subsequent consideration and approval of a revised postmining land use plan in  
10 accordance with the applicable requirements of 405 KAR Chapters 7 through 24.

11 Section 38. Incorporation by Reference. (1) The following material is incorporated by  
12 reference:

13 (a) "Standard Methods for the Examination of Water and Wastewater", (14th Edition,  
14 1975), American Public Health Association, American Water Works Association, and Water  
15 Pollution Control Federation;

16 (b) "Corps of Engineers Wetlands Delineation Manual", (January, 1987 Edition), U. S.  
17 Army Corps of Engineers;

18 (c) "U. S. Army Corps of Engineers Regulatory Guidance Letter No. 90-7", (September 26,  
19 1990), U. S. Army Corps of Engineers;

20 (d) "National Lists of Plant Species that Occur in Wetlands and Biological Reports and  
21 Summary", (May, 1988 Edition), Fish and Wildlife Service, U. S. Department of the Interior; and

22 (e) "List of Hydric Soils of the United States, All Kentucky Counties", (December, 1991  
23 Edition), Soil Conservation Service, U. S. Department of Agriculture;

1           (2) This material may be inspected, copied, or obtained at the Department for Natural  
2 Resources, #2 Hudson Hollow, Frankfort, Kentucky 40601, Monday through Friday, 8 a.m. to 4:30  
3 p.m.

405 KAR 8:030 approved for filing.

Date

Leonard K. Peters, Secretary  
Energy and Environment Cabinet

**PUBLIC HEARING AND PUBLIC COMMENT PERIOD:** A public hearing on this administrative regulation shall be held on September 30, 2014 at 10:00 A.M. (Eastern Time) at Conference Room D-16 of the Department for Natural Resources at #2 Hudson Hollow, Frankfort, Kentucky. Individuals interested in being heard at this hearing shall notify this agency in writing by September 23, 2014, five workdays prior to the hearing, of their intent to attend. If no notification of intent to attend the hearing is received by that date, the hearing may be cancelled. This hearing is open to the public. Any person who wishes to be heard will be given an opportunity to comment on the proposed administrative regulation. A transcript of the public hearing will not be made unless a written request for a transcript is made. If you do not wish to be heard at the public hearing, you may submit written comments on the proposed administrative regulation. Written comments shall be accepted until September 30, 2014. Send written notification of intent to attend the public hearing or written comments on the proposed administrative regulation to the contact person.

**CONTACT PERSON:** Michael Mullins, Regulation Coordinator, #2 Hudson Hollow, Frankfort, Kentucky 40601, phone (502) 564-6940, fax (502) 564-5698, email Michael.Mullins@ky.gov.

## REGULATORY IMPACT ANALYSIS AND TIERING STATEMENT

Administrative Regulation No.: 405 KAR 8:030

Contact Person: Michael Mullins, Regulation Coordinator

(1) Provide a brief summary of:

(a) What this administrative regulation does: This administrative regulation establishes requirements for the grant of a surface coal mining permit.

(b) The necessity of this administrative regulation: This administrative regulation is necessary to establish the criteria to grant surface mining permit.

(c) How this administrative regulation conforms to the content of the authorizing statutes: KRS 350.028(1) authorizes the cabinet to promulgate administrative regulations relating to surface and underground coal mining operations. KRS 350.060 authorizes the cabinet to require a permit before coal mining can begin within the Commonwealth. This administrative regulation establishes the criteria for the issuance of a permit for surface mining operations.

(d) How this administrative regulation currently assists or will assist in the effective administration of the statutes: This administrative regulation establishes the criteria for the issuance of an underground permit which is required by KRS 350.060.

(2) If this is an amendment to an existing administrative regulation, provide a brief summary of:

(a) How the amendment will change this existing administrative regulation: This amendment clarifies the process by which an entity submits proof of right of entry procedures on proposed coal mines sites with severed minerals.

(b) The necessity of the amendment to this administrative regulation: This amendment is necessary to clarify the agency's position on right of entry for proposed coal mines sites with severed minerals.

(c) How the amendment conforms to the content of the authorizing statutes: KRS 350.060 authorizes the cabinet to require a permit before coal mining can begin within the Commonwealth. This amendment is clarifies the agency's position on right of entry for proposed coal mines sites with severed minerals.

(d) How the amendment will assist in the effective administration of the statutes: This amendment is clarifies the agency's position on right of entry for proposed coal mines sites with severed minerals.

(3) List the type and number of individuals, businesses, organizations, or state and local governments affected by this administrative regulation: There are 332 permittees with active permits that this administrative regulation could impact. They would only be impacted if they requested a permit on properties where the private mineral estate is severed from the private surface estate.

(4) Provide an analysis of how the entities identified in question (3) will be impacted by either the implementation of this administrative regulation, if new, or by the change, if it is an amendment, including:

(a) List the actions that each of the regulated entities identified in question (3) will have to take to comply with this administrative regulation or amendment: This amendment simply clarifies an applicant's right to enter a property and mine would be determined by applicable state law.

(b) In complying with this administrative regulation or amendment, how much will it cost each of the entities identified in question (3): The cabinet is unable to determine the cost to each permit applicant. The nature of the dispute will ultimately determine the cost associated with this amendment.

(c) As a result of compliance, what benefits will accrue to the entities identified in question (3): The amendment will help a permit applicant better understand the right of entry requirements for permits involving severed mineral estates.

(5) Provide an estimate of how much it will cost the administrative body to implement this administrative regulation:

(a) Initially: This new administrative regulation will not significantly increase the cost to the Division of Mine Permits.

(b) On a continuing basis: Future costs would remain essentially unchanged related to this amendment.

(6) What is the source of the funding to be used for the implementation and enforcement of this administrative regulation: A combination of general funds and restricted funds will be used.

(7) Provide an assessment of whether an increase in fees or funding will be necessary to implement this administrative regulation, if new, or by the change if it is an amendment: There will not be a need to increase fees or funding related to this proposed administrative regulation.

(8) State whether or not this administrative regulation established any fees or directly or indirectly increased any fees: This administrative regulation does not increase or establish any fees.

(9) TIERING: Is tiering applied? (Explain why or why not) No. All entities that request a permit involving severed minerals will be treated the same.

## FISCAL NOTE ON STATE OR LOCAL GOVERNMENT

Admin. Regulation No. 405 KAR 8:030

Contact Person: Michael Mullins, Regulation Coordinator

1. What units, parts or divisions of state or local government (including cities, counties, fire departments, or school districts) will be impacted by this administrative regulation? The Division of Mine Permits.

2. Identify each state or federal statute or federal regulation that requires or authorizes the action taken by the administrative regulation. KRS 350.028, and 350.060.

3. Estimate the effect of this administrative regulation on the expenditures and revenues of a state or local government agency (including cities, counties, fire departments, or school districts) for the first full year the administrative regulation is to be in effect.

(a) How much revenue will this administrative regulation generate for the state or local government (including cities, counties, fire departments, or school districts) for the first year? This new administrative regulation will not generate any new revenue for the state or local government.

(b) How much revenue will this administrative regulation generate for the state or local government (including cities, counties, fire departments, or school districts) for subsequent years? This new administrative regulation will not generate revenue in subsequent years.

(c) How much will it cost to administer this program for the first year? There will not be a cost increase associated with the amendments to this administrative regulation.

(d) How much will it cost to administer this program for subsequent years? Future costs would remain essentially unchanged related to this amendment.

Note: If specific dollar estimates cannot be determined, provide a brief narrative to explain the fiscal impact of the administrative regulation.

Revenues (+/-): NA

Expenditures (+/-): NA

Other Explanation: NA

## FEDERAL MANDATE ANALYSIS COMPARISON

Administrative Regulation # 405 KAR 8:030

Agency Contact: Michael Mullins, Regulation Coordinator

1. Federal statute or regulation constituting the federal mandate. 30 C.F. R. Part 730
2. State Compliance Standards. KRS 350.060(3)(d).
3. Minimum or uniform standards contained in the federal mandate. 30 C.F. R. Part 778.15.
4. Will this administrative regulation impose stricter requirements, or additional or different responsibilities or requirements, than those required by the federal mandate? No. This amendment will mirror the federal language
5. Justification for the imposition of the stricter standard, or additional or different responsibilities or requirements. NA
